

## Routine Immunization Session (infant)

Ch. 12 - Immunization - Community health - Nursing

1. Check the cold chain: VVM stage, vial condition, and expiry before drawing up.
2. Reconstitute where required; change to a fresh sharp needle before injecting.
3. Inform the caregiver; obtain consent; confirm the child's immunization history.
4. Administer the vaccine at the correct site (vastus lateralis for infants).
5. Observe for 15 minutes; be ready to manage anaphylaxis.
6. Document on the child health card and tally sheet; give the return date.
